IFR FRANCE REINFORCES ITS PRESENCE IN CIS REGION – VLADIVOSTOK AIR 3rd AMASIS CUSTOMER IN RUSSIA, 7th IN CIS

AMASIS TO ASSURE THE MAINTENANCE OF VLADIVOSTOK AIR FLEET

Toulouse, July the 19th, 2011

Vladivostok Air General Director Vladimir Alexandrovich SAIBEL has inked, the 13th of July, 2011 the agreement for the implementation of the IFR France **AMASIS** MRO solution.

Focusing on a constant improvement for its maintenance processes, Vladivostok Air has decided to implement AMASIS V9.15. Providing a higher degree of visibility on the airworthiness management of its fleet, **AMASIS** was the best option to monitor the maintenance of its growing fleet.

ABOUT VLADIVOSTOK AIR

Today, Vladivostok Air is the largest air carrier on Russia's Far East with 24 domestic and 13 international destinations and operates regular, chartered and cargo flights. Vladivostok Air has a modern air fleet: A 320, A 330, Tu-204-300, Yak-40, Mi-8. The flight and engineering staff of Vladivostok Air combines years of experience and training with a constant goal of maintaining the highest qualifications.

ABOUT AMASIS

AMASIS is an integrated solution to manage aircraft maintenance developed and distributed by **IFR France**. AMASIS used by both commercial and state-owned operators performing or subcontracting their aircraft maintenance and airworthiness survey. AMASIS is fed with each department's specific information: Technical records, MCC, Engineering & Planning, Procurement, Stores. With more than 80 active licences worldwide, our expert teams give you all the tools to assist you throughout the implementation. From auditing to consulting and support, we follow your project so you can meet your business objectives.
